Dear Jason:

It is with great appreciation that I write this letter of recommendation for Kaiser Construction. As you probably remember, Dr. Khalifa and I are busy guys and we really needed a crew that would take the reigns and build a quality office, without us having to micro-manage the job. You did just that and exceeded our expectations. Our first build at Tatum was with another well known dental builder, and it seemed like they cut corners wherever possible. We feel that you did the opposite with our build. There are many finishes in the office where you had the opportunity to cut the cost, but you did us well and still used quality products. We appreciate all the hard work you put into the space, and the professional manner in which you worked.

Also, since the completion of the project you have gone well beyond the call of duty. When we were burglarized, you had Shawn on it immediately and the windows were secured that day, along with any patchwork to make the office functional. We never had to close, which is a testament to you guys helping us out.

Any other warrantee work has been completed in a timely manner, and although we know its required for you to continue to warrantee the office, I have built 2 houses and often found that after the project is done, its next to impossible to get support. We have found the opposite with you. Whenever any little issue arises, you have been there quickly and without having to make numerous calls.

It is without hesitation that Canyon Ridge Endodontics would recommend Kaiser Construction for a dental build out. Our experience was largely positive and we are satisfied with the office

Thank You,

Thomas Lamnot DDS
Owner of Canyon Ridge Endodontics
